[ACCJC News] By the Numbers

ACCJC's **By the Numbers** LinkedIn series continues to highlight data that demonstrates the important role our member institutions play in supporting student success and strengthening the workforce.

In the latest graphic in the series, which we are sharing in recognition of **National Career Development Month**. The graphic highlights a powerful workforce outcome: across more than **1,400 career and technical education programs** at ACCJC member institutions, the median reported job placement rate is 82%, and nearly **4 in 5 programs report placement rates of 70% or higher**.

We invite you to help amplify this message by:

- **Following ACCJC on LinkedIn**.
- Reposting our campaign graphics when they are published.
- Adding your own institution-level data point, workforce outcome, or student success metric to highlight the impact your college is making in your community.

Career and technical education programs help students develop the skills employers need while creating pathways to meaningful careers and economic mobility. Together, we can help showcase the vital role two-year institutions play in preparing the workforce of today and tomorrow.

Thank you for being part of this effort. We look forward to highlighting your impact alongside institutions across the ACCJC membership.
