

COLLEGE OF MICRONESIA-FSM
BOARD POLICY NO. 3113

Title: Grade Point System

Date Adopted: April 1, 1993

Date Revised:

Date Reviewed: 24 March 2018

References

A grade point system is used to compute a student's grade point average (GPA). The numerical value assigned to each grade is as follows:

A - 4.0

B - 3.0

C - 2.0

D - 1.0

F - 0.0

W - not computed

I - not computed

Grade point average is computed as follows:

1. Compute the grade points earned for each course by multiplying the course credits by the numerical value of the grade received in that course.
2. Compute the total grade points earned by adding the grade points earned for all courses attempted.
3. Divide the total grade points earned by the total number of credits attempted to obtain the grade point average.
4. Only courses taken at the College of Micronesia-FSM are used in computing the cumulative grade point average.
